FARHAN ALI

IT Engineer

Karachi, Pakistan | +92 330 6226290 | farhan.babar123@gmail.com | xunzag.vercel.app

Profile

IT professional with hands-on experience across help-desk ticketing (Zendesk), remote support tooling (Splashtop), Microsoft 365 administration, and cloud infrastructure (Azure, AWS). Combines a technical development background with direct, day-to-day user support: troubleshooting issues, managing accounts and access, and resolving requests within a structured ticketing and escalation process. Comfortable working across both the support desk and the underlying systems that keep them running.

Work Experience

IT Lead - VirtueServe Solutions (Pvt) Ltd.

September 2026 – Current | Karachi, Pakistan

- Lead IT support for a US-based property management client, triaging and resolving user tickets through Zendesk and supporting staff remotely via Splashtop.
- Hold Global Administrator access to the company Microsoft 365 tenant, managing user accounts, licensing, mailboxes, and permissions.
- Administer the client's Microsoft 365 tenant as Exchange, User, and SharePoint Administrator, handling account provisioning, mailbox issues, and access control.
- Designed and rolled out a standardized, permission-locked SharePoint folder structure across the client's properties.
- Authored runbooks for device onboarding (Entra ID join, Intune enrollment) and an internal knowledge base of resolved tickets.
- Troubleshoot line-of-business applications (Yardi, RentCafe, check scanners) and coordinate escalations with vendors and client stakeholders.

Production Lead & Full Stack Developer - Babar Tech Solutions

January 2025 – September 2026 | Karachi, Pakistan

- Administered the organization's Microsoft 365 environment, including user accounts, licensing, and permissions, across client and internal projects.
- Led end-to-end development and production delivery of client web projects, owning timelines, quality, and deployment.
- Managed cloud deployments on Azure and AWS using Docker and Git-based workflows.
- Worked directly with clients to translate reported issues and requirements into technical specifications and fixes.
- Maintained code quality standards and oversaw testing, staging, and production release cycles.

Full Stack Developer - Elevate Carts

September 2024 – January 2025 | Karachi, Pakistan

- Developed and maintained scalable e-commerce web applications using React.js, Next.js, Node.js, and Express.js.
- Designed and optimized SQL and NoSQL databases for efficient data management.
- Integrated RESTful APIs and third-party services to improve platform functionality.
- Managed cloud deployments on Azure using Docker and Git.

Data Scientist (Intern) - Systems Limited

June 2023 – December 2023 | Karachi, Pakistan

- Analyzed large datasets to extract insights and support data-driven decision-making.
- Developed and fine-tuned neural networks for predictive analysis and ML applications.
- Automated data workflows using Python scripting, optimizing pipelines for faster processing.

Relevant Projects

CDTA Exam Portal (portal.cdtanational.ca)

- Implemented secure authentication and role-based access control, including account creation, permissions, and access management for a non-technical admin user base — directly analogous to enterprise user-account administration.

SHF Safe Home Inspection App (Apple App Store)

- Delivered a mobile-first, reliability-focused field application, including data capture and reporting workflows across iOS devices.

Skills

- **IT Support & Ticketing:** Zendesk, Splashtop, ticket triage & escalation, remote troubleshooting
- **Microsoft 365 & Cloud Administration:** M365 user/license/permissions management, Exchange, SharePoint, Entra ID, Intune, Azure, AWS
- **Networking Fundamentals:** TCP/IP, DNS, LAN/Wi-Fi, VPN concepts (applied through cloud deployment & infra work)
- **Development:** JavaScript/TypeScript, Python, React.js, Next.js, Node.js, Express.js, PowerShell
- **Databases & DevOps:** PostgreSQL, MS-SQL, MongoDB, Docker, Git, GitHub, CI/CD Pipelines
- **Other:** REST APIs, OOP, Data Structures & Algorithms, Access Control & Account Administration

Education

BS Software Engineering - UIT University, Karachi
September 2020 – December 2024

Volunteering

Microsoft Student Ambassador - Karachi *(July 2023 – June 2024)*

- Organized events and workshops on Git, Microsoft tools, and emerging technologies; facilitated peer learning sessions.
